illustrate that the interaction within and between the so-called Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. *Contesting Islam, Constructing Race and Sexuality* unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development. Formerly published by Chicago Business Press, now published by Sage Database Design, Application Development, and Administration, Seventh Edition, offers a comprehensive understanding of database technology. Author Michael Mannino equips

Get comfortable with simple techniques that you can use to bring order to project management chaos. Don't just read about it: see it and hear it, with step-by-step video tutorials and valuable audio sidebars. Way more than just a book, this is all the help you'll ever need... where you want, when you want! Learn Fast, Learn Easy! Using web, video, and audio Show Me video walks through tasks you've just got to see – including bonus advanced techniques Tell Me More audio delivers practical insights straight from the experts Let Me Try It tasks break down the complex into easy-to-follow, step-by-step sequences This book takes a practical problem-solution approach to common business challenges. You'll not only encounter interesting code samples, but also see how to combine these examples with the Microsoft collaboration platform's services. The book's solutions focus

on using Visual Studio 2008 and its built-in Office development tools to construct the user interface layer. And solutions can interact with SharePoint as a service provider, taking advantage of SharePoint's many collaboration features like document repositories, collaboration sites, and search functions. This book is unique because it starts with challenges that end users deal with every day when using the Microsoft collaboration platform to support business processes. The solutions are presented as hypothetical business challenges of a fictional company. By presenting the examples in this context, author Ed Hild makes it easier to relate to the challenges and solution value. The goal of these examples is to build applications that apply the benefits of the Office desktop interface to the richness of SharePoint collaboration features. This book will help you develop real-world solutions to complex business problems and challenges. Written by a four-time SharePoint MVP, this book examines the differences between SharePoint Foundation (SPF) and SharePoint Server (SPS). Appropriate for consultants and IT professionals who need to understand how to plan, implement, and configure SharePoint, administrators and the support team that must know how to manage SharePoint, IT managers and project leaders, it assumes no previous knowledge of SharePoint. The version adds full integration support for Microsoft Office 2010 and Visio 2010, Microsoft's new FAST search, and mobile and Groove client support. With the growing significance of the end-user in architecture, the subject of briefing is a re-emerging one in architectural education.

Various types of computer programs and database management systems have aided in the organization and utilization of brief information as a framework for designing and identifying potential improvements. Computer-Mediated Briefing for Architects overviews the possibilities and limitations offered by various types of computer programs, such as database management systems, diagramming software, CAD, and BIM. This book offers a practical approach in the accommodation of these programs and is an essential reference

for architectural educators, students, and practitioners with hands-on experience in either compiling briefs or using the briefs for design.
